

Wellcam™

Wellcam is the first camera designed to empower safe and healthy independent living.

By introducing Wellcam to a loved-one's home, Alarm.com subscribers can extend their blanket of smart home protection and provide peace of mind for their entire family.

Two-way voice and live video calls connect through the Alarm.com app and enable caregivers and family to stay connected to a loved one and actually see how they are doing. Activity alerts and highlights provide reassurance when all is well and an additional safety net for detecting trouble.

WELLCAM FEATURES

Placed in a living room or kitchen area, Wellcam's 180-degree field of view camera with 1080p resolution and 6mp zoom can monitor an entire space and provide a direct connection between Alarm.com subscribers and their loved-ones.

While traditional independent living solutions like PERs are designed to respond to after an emergency, Wellcam keeps families ahead of trouble.

Check In

Visually verify how a loved one is doing with video calls through the Alarm.com mobile app.

View Highlights

A daily summary of activity highlights lets family monitor quality of life with just a glance.

Call Out

Push Wellcam's call button to get connected to family or let them know if there's an emergency – no smartphone required.

Play Audio

Listen to music or podcasts through the camera like a regular Bluetooth speaker.

Zoom In

Sharpen your focus and see every detail with high-resolution enhanced zoom.

Get Proactive Peace of Mind

With the Wellness service, stay informed about changes in activity level that may indicate emerging health issues about dangerous situations like wandering.
